HIGHLIGHTS OF ORLANDO, FL NATIONAL COMPENSATION SURVEY MARCH 2002

Workers in the Orlando, Florida metropolitan area averaged \$14.00 per hour during March 2002, according to a new survey released by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Regional Commissioner Janet S. Rankin reported that white-collar workers averaged \$18.36 per hour and accounted for 43 percent of the workers in the area. Blue-collar employees averaged \$13.07 per hour and represented 20 percent of the workforce, while the remaining 37 percent worked in service occupations and earned \$9.36 per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal Government. This NCS covered 168 firms representing 328,200 workers in the Orlando metropolitan area, which includes Lake, Orange, Osceola, and Seminole Counties in Florida. Eighty-three percent of those represented worked in private industry.

In the Orlando metropolitan area, average hourly wages were published for over 50 detailed occupations. (See table 1.) Among white-collar workers, elementary school teachers averaged \$24.23 per hour; registered nurses, \$23.28; and hotel clerks, \$7.96. Blue-collar occupations included truck drivers earning \$9.93 per hour, construction laborers at \$9.80, and laundering and dry cleaning machine operators at \$7.74. In the service occupations, correctional institution officers averaged \$15.01 per hour; nursing aides, orderlies and attendants, \$9.17; and maids and housemen, \$8.15.

The NCS also provides broad coverage of selected occupational characteristics. (See tables 2 and 3.) For example, full-time employees in the Orlando area averaged \$14.59 per hour and part-timers earned \$8.54. Union workers in blue-collar jobs averaged \$17.09 per hour, while their nonunion counterparts made \$12.58. Private industry workers at establishments employing 50-99 workers averaged \$12.82 per hour, while those in establishments with 500 or more employees earned \$12.83.

The NCS is part of a statistical program that will eventually integrate three separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. Average rates of pay are also available for levels of work within an

occupation based on knowledge, skill, independent judgement, supervision received, and other factors required on the job.

Survey Availability

Complete survey results are contained in the Orlando, FL National Compensation Survey March 2002 (Bulletin 3115-30). While supplies last, single copies of the bulletin are available from the Atlanta Information Office by calling 404-331-3415. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at http://www.bls.gov/ncs/home.htm. Select survey tables can also be obtained from the Bureau's fax-on-demand service in Atlanta by dialing 404-331-3403 and requesting document 9530.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the Atlanta Information Office at 404-331-3415 from 9:30 a.m. to 3:30 p.m. ET.

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.
² A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

 $^{^3}$ Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

⁴ Union workers are those whose wages are determined through

Onlon workers are those whose wages are determined through collective bargaining.

Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production

bonuses. 6 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.
